Who We Are:

We are a group of like minded radio operators that assist with Orange County Emergency Management, National Weather Service, and various local public service events.

We use all of our FCC privileges to accomplish any task at hand, utilizing UHF/VHF repeaters, digital modes, and HF frequencies for things like weather reporting and spotting, contests, and local communication support.

Volunteer!

We are all volunteers with a passion, the knowledge, and drive to help the community grow and to encourage other ham radio hobbyists new and old alike.

RACES:

Radio Amateur Civil Emergency Services

We utilize our unique communication skills in coordination with Orange County Emergency Management to assist with the Indian Point Drill, the New York Air Show at Stewart IAP, and emergencies throughout Orange County.

ARES:

Amateur Radio Emergency Services

Assist with local public service events such as Run 4 Downtown, TOUGHMAN Triathlon, and the Classic 5K and 10K. Not only are ARES events fun, but they offer an excellent opportunity to gain experience for when emergency situations arise!

SKYWARN:

As SKYWARN Weather Spotters, we support the National Weather Service by reporting rainfall and snowfall totals. Spotters also report any severe weather phenomenon or hazardous conditions, such as downed trees or telephone wires and other local conditions. This information can be vital when other communication avenues may be compromised due to severe weather.

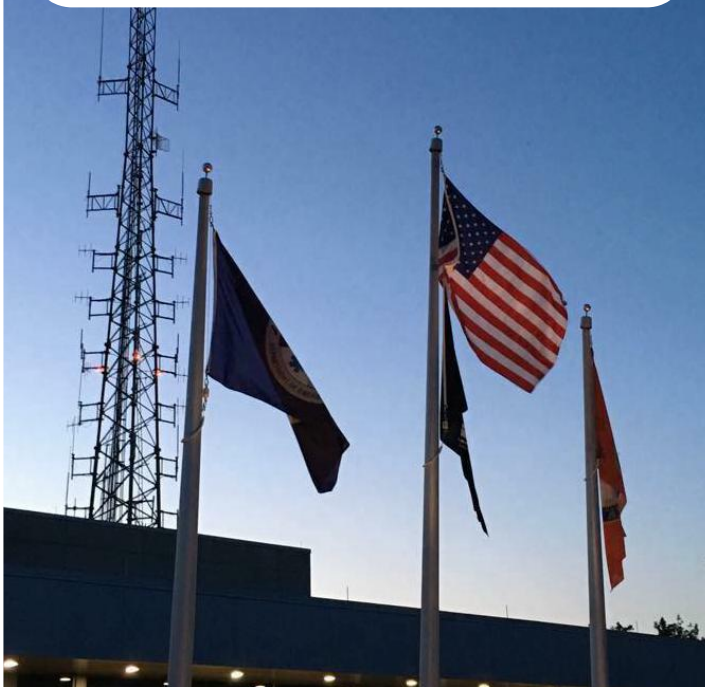

Meetings:

Orange County ARES / RACES has a weekly on air net every Monday night at 8 PM on the KC2OUR linked repeater network.

On the last Monday of the month, we have our face-to-face meeting at the Emergency Service Center in Goshe at 22 Wells Farm Road at 7 PM.

All licensed amateur radio operators are welcome! You do not need to be a member in order to check in to the weekly nets, and **anyone** can attend the face-to-face meetings!

Topics differ from week to week, including Q & A's! And don't forget to stick around for Swap and Shop!
